The Experts in Pest Control

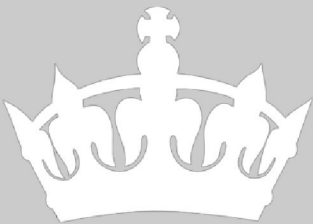

Termites are tiny but **crafty**

Find out what **damaging** role they play in your home

1.5mm is all a gap needed for **termite** to fit through

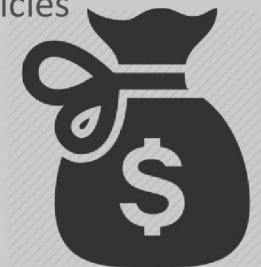

Termites consume **5** grams of wood by average colony a day = **8 lb** over **2 years**

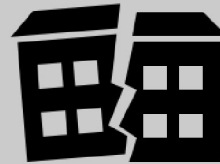

The **Queen** lives more than **25 years** and produce up to **1,000** eggs a day

Termite damage is not covered by most home insurance policies

Termites workers are always eating **24 hours** a day

It only takes **1 colony** to destroy a home!

Cost of infestation is **huge** = structural damage repair

Termite infestation can depreciate your **property value**
